

## Rechargeable 12.8v Batterie Lithium Ion Lifepo4 Battery Pack 12v 100ah 200ah 300ah 12 volt Lithium Battery for Ukraine s

Our Product Introduction

for more products please visit us on [enookbattery.com](http://enookbattery.com)

### Basic Information

- Place of Origin: china
- Brand Name: Enook
- Model Number: Enook Battery Pack
- Payment Terms: TT PAYPAL

#### PRODUCT PARAMETERS

12V: 50AH/100AH/150AH/200AH/300AH  
24V: 50AH/100AH/200AH

### Product Specification

- Application: Electric Bicycles/Scooters
- Working Humidity: 65+20%RH
- Standard Voltage: 12.8V
- Operating Temperature: -10 ~+50°C
- Safety Protection: Overcharge Protection, Over-discharge Protection, Short Circuit Protection, Over-current Protection
- Voltage/Capacity: Customized
- Capacity: 75Wh/ 102Wh/ 128Wh/ 256Wh/ 384Wh
- Cycle Life: 3000~6000 Cycles@D0D 80%/25°C/0.5C
- Highlight: 100ah Lifepo4 Battery Pack,  
12v Lifepo4 Battery Pack,  
100ah 200ah 300ah Lifepo4 Battery Pack

### Product Description

#### Product Description:

Our Lithium Ion Battery Pack is a pinnacle of modern battery technology, tailored specifically for those who demand reliability, high performance, and flexibility in their power solutions. This battery pack is designed to cater to a plethora of applications, especially suited for electric car, where consistent power delivery and endurance are key. With the ability to

Our Product

operate at working altitudes of up to 2500 meters, this battery pack ensures that your electric car's performance remains unaffected whether you're cruising through city streets or exploring high-altitude terrains.

Crafted with the end-user in mind, our battery packs come with customized voltage and capacity options. Whether you need a 48v, 60v, or 72v configuration, with up to a 40ah capacity, we have the flexibility to meet your specific requirements. This customization empowers you to select the perfect balance between weight and range, ensuring that your lithium ion electric car battery pack aligns with your personal or business needs.

At the core of our commitment to excellence is our OEM/ODM service. We understand that each project has unique demands, and our team is poised to deliver solutions that align with your specifications. Our acceptability of OEM/ODM projects means that you have a partner ready to support your vision, from conceptualization to the final product, with a lithium ion electric car battery pack that reflects your brand's values and quality.

Safety is paramount when it comes to power solutions, and our Lithium Ion Battery Pack is equipped with comprehensive safety protection measures. Overcharge protection ensures that the battery ceases to charge once it has reached its capacity, thereby preventing any potential damage. Over-discharge protection guards the battery against excessive depletion, which can extend its lifespan. Short circuit protection is a critical feature that instantly disconnects the battery in the event of a short circuit, safeguarding both the battery and the electric car. Over-current protection monitors and manages the current to prevent any damage from current surges. These safety features work in concert to deliver a reliable and secure power source for your electric car.

The working environment for a battery is crucial, and our Lithium Ion Battery Pack is designed to perform optimally within a working humidity of 65±20%RH. This specification ensures that the battery pack maintains its integrity and efficiency even in varying environmental conditions. Whether you're in a dry or humid climate, our battery pack is engineered to deliver consistent performance, making it an ideal choice for a lithium ion electric car battery pack.

In conclusion, the Lithium Ion Battery Pack is a versatile, safe, and high-performing solution for your electric car's power needs. By offering customized voltage and capacity options, accepting OEM/ODM projects, and integrating robust safety protections, our battery pack stands out as a premium choice in the market. Its ability to operate effectively in diverse altitudes and humidity levels further underscores its adaptability and reliability. Choose our Lithium Ion Battery Pack for your electric car, and experience the peace of mind that comes with a superior power source.

#### Features:

Product Name: Lithium Ion Battery Pack

Battery Type: Lifepo4 Lithium Battery Packs

OEM/ODM: Acceptable

Working altitude: <2500m

Safety Protection:

Overcharge Protection

Over-discharge Protection

Short Circuit Protection

Over-current Protection

Capacity Options:

75Wh 102Wh 128Wh 256Wh 384Wh

Keywords: Lithium Ion Electric Bike Battery Pack

48v 60v 72v 40ah Battery Pack

## 24V SERIES

50Ah/100Ah/200Ah

### Applications:

The Enook Battery Pack is a versatile and powerful lifepo4 lithium battery pack that is ideal for a variety of applications. Manufactured with precision in China, the Enook brand is synonymous with quality and reliability. This lithium ion electric car battery pack is perfect for those who are looking for a dependable power source for their electric bikes. Model Number Enook Battery Pack is engineered to meet the demands of modern electric cars, providing a seamless integration with a variety of models. The customized voltage and capacity options ensure that you can select the perfect battery pack to match your electric car's requirements, enhancing performance and ensuring long rides without the constant need for recharging.

With payment terms that include TT and PAYPAL, acquiring an Enook Battery Pack is convenient and secure. The natural cooling method of the battery pack ensures that it maintains an optimal operating temperature, thus prolonging the life of the battery cells and maintaining efficiency even when used in demanding situations. Designed to function perfectly up to an altitude of  $\leq 2500\text{m}$ , the Enook lithium ion electric car battery pack is suitable for high-altitude adventures, ensuring that your electric bike performs consistently irrespective of the terrain. This feature makes it an ideal choice for mountain cars and adventure enthusiasts who demand reliable power in varied environments.

OEM/ODM services are also acceptable, allowing for customization and branding opportunities for businesses looking to offer their own branded lithium ion electric bike battery packs. The Enook brand takes pride in its ability to adapt to specific customer needs, offering flexibility and collaboration for bespoke solutions.

In summary, the Enook Battery Pack is a high-quality, customizable solution for powering electric car. Its versatility and reliable performance make it an excellent choice for both casual riders and professionals alike. Whether it's for daily commutes or rugged outdoor adventures, the Enook lithium ion electric car battery pack is engineered to exceed expectations and deliver consistent power when it's needed most.

#### Customization:

**Product Name:** Enook Battery Pack

**Brand Name:** Enook

**Model Number:** Enook Battery Pack

**Place of Origin:** China

**Payment Terms:** TT, PAYPAL

**Voltage/Capacity:** Customized (Options include: 48v, 60v, 72v, 40ah battery pack)

**Working Altitude:** ≤2500m

**Operating Temperature:** -10 ~ +50°C

**Cooling Method:** Natural Cooling

Explore the possibilities with our customizable **lithium ion electric car battery pack**. Whether you need a **48v 60v 72v 40ah battery pack** for your electric car or a specialized power solution, our Enook Battery Pack provides the performance and reliability you need. With our tailored approach, we ensure your lithium ion battery pack meets your specific requirements, ensuring a perfect fit for your electric car's power system.

#### PRODUCT COMPOSITION

#### Support and Services:

Welcome to the Product Technical Support and Services section for our Lithium Ion Battery Pack. Here, we are dedicated to providing you with comprehensive support to ensure the optimal performance and longevity of your

product. Our technical support includes troubleshooting guidance, maintenance tips, and advice on best usage practices.

If you are experiencing issues with your Lithium Ion Battery Pack, we recommend first consulting the user manual for troubleshooting steps. Our online resources also include FAQs and detailed guides that may address your concerns. Additionally, we offer a series of instructional videos that cover common procedures such as proper battery handling, charging, and storage.

Regular maintenance is key to the longevity of your Lithium Ion Battery Pack. We provide maintenance services that can help you keep your battery in top condition. This includes diagnostic tests to assess battery health, as well as professional cleaning and conditioning services.

For more complex issues or technical inquiries, our team of expert technicians is available to provide personalized support. While we do not include direct contact information here, you can access our support portal through our website for live chat, email support, or to schedule a service appointment. Your satisfaction and the reliable operation of your Lithium Ion Battery Pack are our top priorities.

#### Packing and Shipping:

##### Product Packaging:

The Lithium Ion Battery Pack is securely encased in a non-conductive, fire-resistant material designed to withstand shocks, vibrations, and temperature fluctuations. The packaging is compliant with international safety standards for the transportation of lithium ion batteries, ensuring the product is well protected during transit. Each battery pack is individually boxed and labeled with safety instructions and handling precautions.

##### Shipping:

This product is classified as Dangerous Goods (DG) due to the nature of lithium ion batteries. It will be shipped in accordance with the latest International Air Transport Association (IATA) regulations for Dangerous Goods. A specialized courier experienced in handling dangerous goods will be used, and all necessary documentation, including a Material Safety Data Sheet (MSDS), will be provided. Our team ensures that the package is properly marked, labeled, and accompanied by a signed Dangerous Goods Declaration. Customers are advised to inspect the battery pack upon arrival and report any damage immediately to the courier and our customer service team.

## Company Introduction

ChangSha Enook Technology Co., Ltd located is an outstanding solution service provider in Lithium Battery Management System(BMS) industry, focusing on the R&D, design, production and sales of Apexium DIY kits, BMS and batteries for more than 15 years. With its strength, it can provide customers with first-class software and hardware development and after-sales services.

Quality first is our principle, Satisfying all our customers is our tenet, win-win business is our aim. Dedicated to strict quality control and thoughtful customer service, our experienced staff members are always available to discuss each detailed requirements from customer and ensure full customer satisfaction.

In addition, we have obtained certificates. MSDS UN38.3 MSDS, ROHS, UL, etc. All our products keep selling well not only around China, but also in USA, Philippines, Germany, England, Australia, Russia, France and other European and Asia countries. Fast delivery is one of our advantages, selecting a current product from catalogue, or customized products, 3~5 days is the normal time to prepare for the goods. OEM & ODM orders can be acceptable.

Please don't hesitate to contact us if you have any requirement, we'll provide our best service to you.
